ANIKET GAWADE

Full Stack Developer
+91 8830837435 | anigawade05@gmail.com | Sawantwadi, India
Portfolio | GitHub | LinkedIn | LeetCode

SUMMARY

Full Stack Developer with hands-on experience building scalable, production-grade web applications using React.js, Next.js, and Node.js. Skilled in designing efficient RESTful APIs, implementing secure authentication systems, and optimizing application performance to significantly reduce load times and enhance user engagement. Proven ability to take projects from concept to deployment in fast-paced environments. Passionate about writing clean, maintainable code and solving real-world problems.

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL,Java
Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Zod,Zuestent
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication
Databases: MongoDB, PostgreSQL (Neon), MySQL, Supabase
Tools & DevOps: Git, GitHub, Postman, Vite, Vercel, Render, Railway, Docker,Redis,Clerk
Testing: Jest (Unit & Integration Testing)
Core Concepts: Data Structures, API Design, Authentication, Performance Optimization, SEO

EXPERIENCE

Web Development Intern | AI Pathshaala
June 2025 – Aug 2025 | Remote

- Engineered responsive web applications using modern JavaScript frameworks, increasing user engagement by **30%**
- Reduced page load time by **50%** through code splitting, lazy loading, and asset optimization
- Boosted organic traffic by **40%** by implementing SEO best practices, including structured data and semantic HTML
- Built reusable and scalable UI components, improving development efficiency and code maintainability
- Collaborated in Agile/Scrum teams to deliver production-ready features within sprint deadlines

PROJECTS

AI Career Coach

- Developed an AI-powered career platform using **Next.js and Gemini AI** for personalized resume feedback and skill-gap analysis
- Implemented secure authentication and session management using **Clerk**
- Improved performance using **Server-Side Rendering (SSR)**, reducing initial load time and improving SEO
- Designed scalable backend architecture with **PostgreSQL (Neon)** for efficient data handling
- Built responsive dashboards using **Tailwind CSS and shadcn/ui**

Audit Management System

- Built a full-stack **MERN application** for financial and audit workflow automation with role-based access control
- Implemented secure **JWT authentication** to protect sensitive financial data
- Developed RESTful APIs for audit logs and reporting, improving system reliability
- Added multilingual support (**Marathi**), enhancing accessibility for regional users
- Improved frontend performance using **Vite** and ensured reliability with **Jest testing**

LMS Platform

- Engineered a scalable **Learning Management System (MERN)** supporting course management and progress tracking
- Integrated **Stripe payment gateway** for secure transactions and subscription handling
- Optimized **MongoDB schema design** for efficient handling of large-scale video content
- Developed responsive UI using **React.js** for seamless cross-device experience
- Deployed production-ready application using **Vercel and Render**

ACHIEVEMENTS

- Secured **Top 15 position nationally** at WCE Hackathon 2026, Walchand College of Engineering
- Selected among **Top 120 teams nationwide** at Project Morphosis Hackathon 2026, SIT Pune
- Ranked in **Top 52 teams across Maharashtra** at Codeshetra Hackathon 2026, DKTE

EDUCATION

B.Tech in Computer Science
D.Y. Patil College of Engineering, Kolhapur
2023 – 2027 | GPA: **8.9 / 10**
Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems

---

CERTIFICATIONS

- Full Stack Development — Apna College (2024)
- Cisco Cybersecurity Internship — Cisco (2025)
